

Easily deployed almost anywhere, CleanPod is lightweight, yet strong enough to be moved with a forklift or transported on a flatbed trailer. Drop it off and plug it in. Place it in a warehouse or park it outside, its sturdy insulated walls withstand the harshest conditions. It's easy to custom configure a CleanPod to your needs because they're available from Class 100,000 to Class 100 and can meet military, semiconductor, FDA, ISPE and IEST standards. Add laminar hoods, sinks, water purification systems, gas lines, or whatever it takes to make it a complete self-contained cleanroom.

### Benefits

- Complete operational cleanroom
- Mobile, portable
- Completely washable inside and out
- One point utility hookup or self-contained utilities
- Transport via overhead hoist, forklift, or trailer
- Flexible designs
- Suitable for Class 100 to 100,000
- Maintain strict temperature and humidity requirements
- Tough exterior construction
- Lease or purchase plans available

### Uses

- Cleaning/Packaging
- Bio-Defense
- Emergency Response
- Clinical/Operation Rooms
- Fabrication
- Storage
- Metrology

### Installations

Originally designed with and for use by the US Navy, the CleanPod is a portable, self-contained environment that provides complete control over critical processes while saving time and money.

### Accessories

- Pure water systems
- Chemical/gas delivery systems
- Power generation system
- Humidification control system
- Laminar flow benches
- Exhaust systems
- Gowning rooms
- Storage systems
